

6T™ MILITARY HOSE

POLYESTER DOUBLE JACKETED HOSE

This premium double jacketed military-grade fire hose incorporates a lightweight polyurethane liner that meets all the requirements of NFPA 1960 and Mil Std. 24606. It is designed for use as an attack hand line hose and can be used for potable water transfer in an emergency. The optional Dura-Cote™ treatment greatly increases abrasion, heat, flame and petrochemical resistance while virtually eliminating water pick-up. When treated, 6T™ is protected from mildew and no drying is required, making it easy to manage on the fireground.

FEATURES

- High quality, double jacketed hose made from 100% high tensile strength polyester yarn along with a lining of thermoplastic polyurethane for reduced weight while remaining kink resistant.
- Optional Dura-Cote™ protective treatment.
- Hose remains flexible at temperatures as -40°F (-40°C) to 150° F (65°C).
- Designed for maximum service life and low operating cost for greater value.
- Manufactured in accordance with NFPA 1960 Standard, latest edition within our ISO-9001:2015 certified quality assurance system.
