

SUPREME™

PREMIUM HOSE. OUTSTANDING VALUE.

Supreme™ is a durable, rugged, traditional double jacketed fire hose and one of the best values on the market today. Originally designed over 40 years ago, Supreme™ has become the hose to which all others are compared. With hose sizes up to 3" and manufactured to exacting standards, our use of ring-spun polyester yarn with a flexible rubber liner and calendered rubber backing, keeps this hose supple when empty and tough when necessary.

FEATURES

- Calendar-backed, double jacketed EPDM rubber lined fire hose made from 100% high tensile strength polyester yarn.
- Liner is attached to the inner jacket using a vulcanized rubber calendar backing that mechanically and chemically bonds the EPDM rubber lining to the inside jacket without the use of glues, and provides the assurance that the lining will not delaminate.
- Optional Dura-Cote™ treatment.
- Remains flexible at temperatures as low as -40°F (-40°C) and is resistant to ozone and oxidation.
- Optional color-coded stripe of one contrasting color can be woven into the outer jacket running the entire length of the hose for identification purposes.
- Kink resistance exceeds that of lightweight jacketed hose.
- Suitable for use with CAFS and foam solutions.
- Manufactured in accordance with NFPA 1960 Standard, the latest edition within our ISO-9001:2015 certified quality assurance system.
