FIRE ENGINE BOOSTER HOSE

MULTIPLE TEXTILE SPIRAL REINFORCED EPDM RED REEL BOOSTER HOSE

Designed for high-performance reliability from structure fires to forest blazes, the multiple braid reinforced red reel hose features a specially compounded Ethylene Propylene Diene Monomer (EPDM) tough cover that resists abrasion and weathering. Inside, a smooth black synthetic EPDM rubber inner tube adds flexibility and sure, high-power flow. Available with Barway or external crimped steel couplings.

FEATURES:
- EPDM rubber fire hose is reinforced with multiple textile spiral, and smooth inner lining for exceptional strength, durability and flow.
- EPDM rubber compound provides a durable, flexible cover that resists abrasion, gouging, ultra-violet and ozone damage, as well as most chemicals.
- A smooth outer cover lowers drag resistance for sure serviceability.
- Fully loaded, ready on reel, multi-purpose frontline attack hose, handles structure and vehicle firefighting; grass, wildland and forestry fires; and industrial applications.
