

OUR STORY

INNOVATION FOR THE PAST 50 YEARS BECAUSE OUR CUSTOMERS HAVE PUT THEIR TRUST IN US YEAR AFTER YEAR.

At Snap-tite Hose, we've built our reputation on manufacturing industry-leading quality firehose in the United States. It all started in 1969, when Snap-tite formed its Hose Products Division and in 1977, entered into a joint venture with a West German company to manufacture lay-flat hose in Union City, Pennsylvania. Snap-tite is credited with introducing the concept of large diameter hose (LDH) and driving its widespread use throughout North America. Today, virtually every fire department in America uses LDH to move water efficiently.

In 1980, Snap-tite bought out its partner to form Snap-tite Hose, Inc. In 1990, the Company purchased Ponn Hose and in 1995, it acquired National Fire Hose. Snap-tite sold the hose division to All-American Holdings, LLC in June 2010. In April 2016, a group of private investors acquired the assets of All-American Hose, making it one of the largest fire hose manufacturers globally. Today, AAH Acquisition, LLC is doing business as Snap-tite Hose. The company remains true to our commitment to engineer and manufacture the industry's best firehose. Every day our team of 195+ works at the Company's three facilities — two in Pennsylvania and one in North Carolina — to deliver on that quality promise.

Why do customers continue to choose Snap-tite Hose?

EXPERTISE: We have some of the most dedicated and knowledgeable staff available to assist you in deciding what hose flow system works best for you. We know that all hose needs are not the same, nor should they be. So the hose flow system should be tailored to the needs of the end-user.

LONGEVITY: Our National, Ponn and Snap-tite brand hoses, like TPX, HFX and Conquest, have been manufactured and sold just as long as we've been in business. Our customers know that these are tools they can always rely on to do the job time and again. No other USA hose manufacturer has been in business for over 50 years.

QUALITY: We have a quality system unlike any other. We test our hose products to current standards including but not limited to NFPA, UL, and FM standards. We also subject our manufacturing processes, procedures, and facilities to ISO 9001-2015 standards. Our competition states they manufacture to "ISO-like standards" but we actually go through the certification and surveillance audits to ensure that our quality processes continue to perform year after year.

Our mission is this: To manufacture lay-flat hoses to World Class standards to satisfy the need for safety, performance and durability for all end-users in the industries we serve.

INNOVATIVE. HONEST. MANUFACTURED WITH YOU IN MIND.
